

SIMPLIFY YOUR LIFE

TagPrint Pro 4.0
labelling software for
cable and component
marking

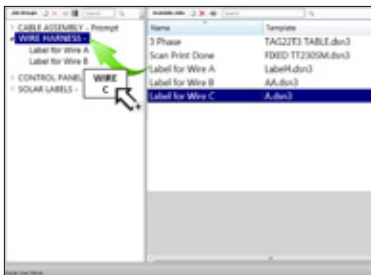

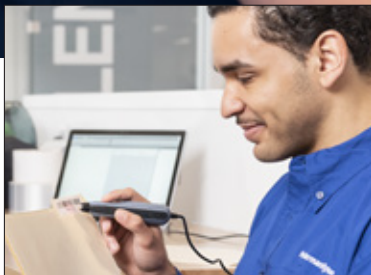

MADE FOR REAL 

The new **TagPrint Pro version 4.0** is the next level of the easy-to-use label design and printing software in the HellermannTyton printing system for achieving improved efficiency in wire and component marking, asset tagging, and structured cabling identification. With TagPrint Pro you can print single jobs but also batch print to either one or more printers at the same time.

SIMPLIFY YOUR LIFE

TagPrint Pro 4.0 labelling software for cable and component marking

Create print job groups with drag-n-drop simplicity and print entire batches with a simple scan or a bar code with the new Print Automation

MADE TO DESIGN

- Intuitive design tools that manipulate bar codes, text and graphics with ease
- Design Wizards easily guide a user through the addition of text, images, and barcodes to create a label
- What You See Is What You Get (WYSIWYG) label creation software with practical pull-down menus and a wide array of design options
- Software includes hundreds of clip art images (or import your own)
- Flip, rotate, inverse or mirror image graphics and text
- All HellermannTyton labels and markers are already preconfigured in database
- Connect or import directly from other databases including Excel, Access, text files

SCAN – PRINT – DONE

The new HellermannTyton **Print Automation** is the powerful workflow assistant built into TagPrint Pro label design software. Print automation delivers a simple yet powerful solution to create labels in a fraction of the time.

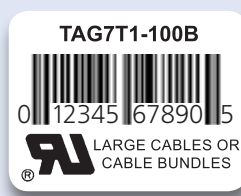

Can increase label production speeds by as much as 23 times. For high mix/low volume label jobs, reduce labour by 20 % or more – particularly in full automation mode.

NEW 4.0 FEATURES

Optional wizards easily guide you through label setups; Featured: **Panel Label Wizard** – Create dynamic endless strips with several text elements

Barcodes now **automatically scale** and fit within the label

Excel functions within TagPrint Pro such as the new **filter functions** make printing from tables easy and ensure quick
