

Split Heatshrink Repair Kit for HellermannTyton Mechanical Seals

Technical Description

A range of split heatshrink kits designed to provide a permanent repair to damaged/faulty HellermannTyton Cablelok mechanical seals.

Each kit consists of heatshrink, steel closure strips, abrasive strip, cleaning sachet, heatshield and instructions.

The heatshrink is manufactured from crosslinked polyolefin with an internal lining of hot melt adhesive. The heatshrink sleeve has a coating of thermo-chromatic paint which changes colour when the optimum temperature for shrinkage is achieved. The hot melt adhesive lining provides an environmental seal around the cable, damaged mechanical seal and port entry.

Features and Benefits:

- Fast, moisture proof, permanent repair for damaged HellermannTyton mechanical seals
- Available for in 3 sizes:
 - B/S/T Ports
 - L Port
 - LM Port
- Weather resistant and halogen free
- TCP (thermo-chromatic paint) spots indicate the sleeve has been sufficiently heated

Split Heatshrink Repair Kit.

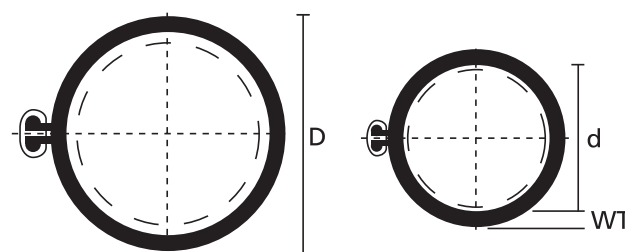

Split Heatshrink Repair Kit Content.

Technical Data

Material	Polyolefin, Chemically cross-linked (PO-X)
Shrink Ratio	Up to 4.5:1
Operating Temperature	-40°C to +120°C
Min. Shrink Temperature	+110°C
Softening Point Adhesive	+105°C
Longitudinal Change After Shrinkage	-10% max.
Dielectric Strength	30kV/mm
Flammability	Not flame retardant
