

Fibre Anchor Kits for Intermittently Bonded Ribbon Fibre for Street Cabinets

Application/Product Description

A range of anchor kits designed for anchoring Intermittently Bonded Ribbon (IBR) Fibre cables up to a maximum cable diameter of 15mm in HellermannTyton Street Cabinets.

Each kit consists of an anchor bracket, cable grip and jubilee clip. The cable grip comes in three sizes, outer cable diameter 7-9mm, 10-12mm and 13-15mm. The grip is fitted around the cable to provide protection and distribute tightening pressure evenly over a wider area reducing the risk of damaging the fibre. The jubilee clip is then placed over the cable grip and anchor bracket and tightened to anchor the cable in place.

Features and Benefits

- Provides strain relief for Intermittently Bonded Ribbon Fibre Cables
- 3 cable kit sizes
 - 7 - 9mm
 - 10 - 12mm
 - 13 - 15mm
- Protects cable from overtightening

Installed in a street cabinet.

AK-SC-IBRC-7-9MM.

AK-SC-IBRC-10-12MM.

AK-SC-IBRC-13-15MM.
