

CEP Micro Capping Base

Application Information

The CEP Micro Capping Base has been designed by HellermannTyton to be clipped onto the 44mm CEP Micro Capping and is one of the accessories developed for the Customer Entry Point (CEP) Enclosure.

Product Description

The CEP Micro Capping Base can be clipped at the bottom of the CEP Micro Capping and fixed to the wall. The wider shape of the base allows connection to a duct 56 like the connector Bend 4 or ‘Elephants foot’.

Manufactured in grey RAL7040 PC-ABS, the CEP Micro Capping Base is UV stabilised. Other colour options are available (black or brown).

Features and Benefits:

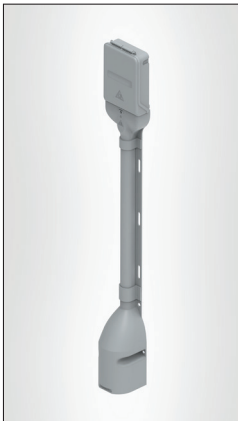

- Covers duct 56 access hole
- Compatible with the CEP Micro Capping
- Discreet wall-mounted accessory
- Protection from water ingress
- UV Stable
