

Precision tools for an impeccable clean...

Ensuring good fibre optic cleaning practises during installation will enhance the performance of that fibre connection.

Fibre cleanliness is critical for maintaining signal quality and transmission efficiency. Any dirt or contaminants on these fibres can disrupt the signal, affecting performance.

Our fibre cleaning kits and products are designed to keep fibres clean at all stages of the installation from splicing through to connecting.

Highlights

- END FACE Cleaners
- WIPES & SWABS
- Available in KITS
