

Modular 1U 48 Port Panel

Shielded / Unshielded

Application/Product Description

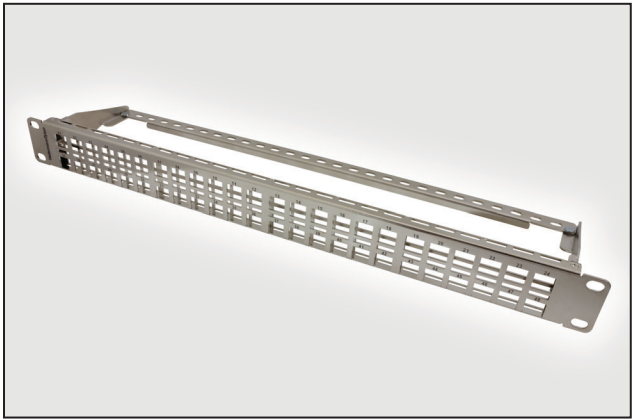

The HTC Series 1U 48 Port Modular patch panel has been developed to allow for simplistic installation of high density copper connectivity. It accepts HTC compatible keystone jacks. It features a folding rear cable manager with cable tie points that simply snaps into place without the need for extra tools or manpower.

Features and Benefits

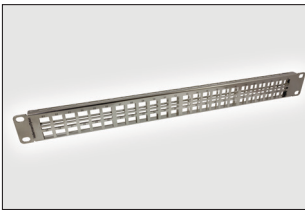

- For High Density Applications
- Plastic Free Packaging
- Detachable, Folding Cable Manager
- Ideal for Shielded or Unshielded Requirements
- 1U 48 Ports
- Compatible with 19 Inch Mounting Profiles

Standards Compliance

- RoHS Compliant
