

## Fusion Splicer V-Groove Swab - Tube/50pcs

HT-FPC-SBVG

### Application/Product Description

Flat, thin head design is ideal for small precision surfaces. No adhesives or binders, so will not leave residue. Wicking action quickly pulls solvent from surfaces.

The Fusion Splicer V-groove and ferrule cleaning swab has a nonwoven polyester head and flexible tip polypropylene handle. They are supplied as 50pcs per tube.

### Features and Benefits

- Flattest, thinnest swab available; ideal for small precision surfaces
- Will not leave residue; no adhesives or binders
- Wicking action quickly pulls solvent from surfaces
- Can be used with Electro-Wash Precision Cleaners and the Combination Cleaning Process on hard-to-remove soils
- Available in durable, field-ready, transparent tubes
- RoHS Compliant

### Typical Applications

- Validate biogenetic/pharmaceutical surfaces
- Clean disk drive components
- Clean sensitive surfaces in optics
- Clean aerospace hardware
