**Technical Data Sheet**

RapidNet Shielded Patch Panel

1U 4 x 6 Port Cassette Panel RNA6G6A-PA1UCN-XX.XX

Application/Product Description

RapidNet is the industries original cassette based pre-terminated cabling system. The patented cassette is factory terminated and tested to the customers required length and configuration, allowing engineers onsite to 'plug and play' saving up to 75% on installation time. This makes RapidNet the perfect solution for mission critical applications and environments with perpetual moves, adds and changes.

The RapidNet Shielded 1U Patch Panel is designed to accept RapidNet Cat6A Shielded 6 port cassettes. This 1U panel takes up to 4 x 6 port shielded cassettes presenting a total of 24 Cat6A ports per 1U. The panel has integral grounding plates which automatically bonds each cassette to the panel when inserted.

RapidNet Shielded Patch Panel.

Technical Data

Characteristics	Specification
Material	1.8mm Mild Steel
Compatible Cassettes	Cat6A 6 Port
Rear Manager	RNRCM - Sold Separately
Shielded	Yes - Integral bonding plates
Blanks	RNBLANK
Packaging	Card Box
Visio Stencil	Yes - Contact HT
Produced in	Northampton, UK
Warranty	25 Year System*

* For full warranty information please visit www.htdata.co.uk/downloads/25-year-warranty

Features and Benefits

- Integral bonding plates for correct system grounding
- Labelling and port identification fields
- Up to 75% reduced on-site installation time
- Accepts 6 port shielded cassettes
- Quick release cassette method
- Optional rear manager available
- Blank cassette inserts available
- 1U 19" rack mountable
