

NEW Cat6A, Cat6 and Cat5e Pod

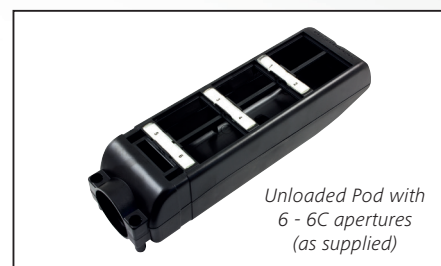

6A 6 5e

The need for high speed, high capacity networking at the desk continues to grow with increasing use of cloud applications and software in everyday working. As well as high performance, there is also the requirement for quick and flexible installations for both direct to the desk or grid mapping designs.

The new HellermannTyton Pod, available in Cat6A, Cat6 and Cat5e for both UTP and FTP, is an important step in being able to install and deliver reliable and resilient network connections in work area applications. Supplied with two different entry sizes and clear labelling for each port and Pod, HellermannTyton has developed the Pod to support growing requirements.

Features and Benefits

- Cable access supports flexible conduit or loose cable entry (the use of conduit is recommended)
- Internal cable tie point to provide an additional securing point
- Clear labelling for all ports and the completed pod
- Supplied unloaded or as part of an RapidNet pre-terminated loom
- Suitable modules adaptors and keystones are available separately
- Floor mounting bracket for 25 and 32mm conduit also available

*Unloaded Pod with
6 - 6C apertures
(as supplied)*
